Technical Paper Guidelines

Conference proceedings will be published by the IEEE as a referenced record of the depth and breadth of activity using HPCMP resources within the DoD. In addition, a subset of approximately six papers will be selected for a special edition of a future IEEE Computer Society publication focusing on high performance computing. If presenters wish to submit a full paper for publication in the IEEE proceedings, it must be submitted by June 9, 2005. At least one presentation and one full paper are required for each Challenge Project and Phase II Capability Applications Project. Papers for Challenge and Capability Applications Projects may be provided at the sensitive but unclassified level if the effort cannot be adequately described in a public release document. These limited distribution papers, however, will not be published in the conference proceedings.

Technical papers must be submitted as either PDF or Word documents. Technical papers should be between four to eight pages long including all figures, graphic images, and references. Due to publication costs, please group your color graphics (pictures, charts, etc) on one page. There is no limit on black and white graphics.

Electronic files should use the following naming convention:

last-name-of-first-author_paper_2005

If you are submitting more than one paper please include a "1", "2", or appropriate number in the naming convention. For the second paper, for example, the naming convention would be:

Last name of first author_paper2_2004

The following additional information will be required when submitting the technical papers:
1. author name(s) and email address(s)
2. author(s) organization(s)

The paper should be sent to techchair@hpcmo.hpc.mil. A copy of the release should be sent to outreach@hpcmo.hpc.mil or fax a copy to outreach at 703-812-9701.

For additional information, please contact the Technical Papers Chair for the 2005 DoD Users Group Conference at techchair@hpcmo.hpc.mil.
